Address:	London E16	**Web site:**	www.nxggroup.co.uk

Background	NXG Training CIC is a young, dynamic training and creative media company with a successful record of running programmes for young offenders which get them excited and enthusiastic about learning; result in them gaining basic qualifications, completing successful work experience placements, and going on to further education, training and employment. We do this by creating 'real life' creative projects involving tutors with real industry knowledge and using communication methods that young people know and love.
Objective	We have already been involved in a successful ESF programme led by NACRO and funded by the GLA which aimed to prevent re-offending and gang involvement by young people leaving Feltham and Rochester YOIs. We have also run other learning and resettlement programmes with young offenders funded through ESF and by OLASS. We would like to be involved in delivering similar projects rehabilitating young offenders during the next ESF round.
Interests	Our programme offer for young people includes initial engagement activities; interactive workshops in music, dance, film, TV, media, graphics; short creative/enterprise programmes including media, music and fashion training; enterprise and employability We also provide mentoring, support and tracking services.
Area of Delivery	We currently work in South East/ South West London and North Kent. We are able to work throughout London and the South East
